

Things You Want In A Platform

- 11 Webapp-like functionality
 - Web App replacement
 - WebApps
 - webapps
 - Web Apps
 - Database
 - Web Apps or Equivalent
 - web apps
 - Database functioning
 - The ability to create simple database integration (Web app functionality)
 - Webapp like functionality

- 11 Unlimited CRM -
 - crm
 - CMS
 - CMS
 - CRM
 - Built-in CRM
 - CRM
 - CRM
 - CRM/CMS, Email and Email Marketing, easy forms management
 - Easy form builder with access to store results against customer
 - A good cms so my client can easily update their site

- 11 Liquid scripting
 - Templating Language
 - Liquid markup or suitable alternative
 - Content holder with optional date and time controls.
 - Access to every bit of the HTML & Javascripts included
 - Full Control over HTML, CSS, JavaScript, liquid like server control
 - "module_data" equivalent
 - server side coding
 - Liquid support
 - Use any code/framework I choose
 - I would like to continue developing with the Foundation platform.

- 9 Easy eCommerce Integration
 - E-commerce
 - Ecommerce and payments (not necessarily just a store)
 - ecommerce/shop
 - Ecommerce with B2B Quote Request option - not everyone does payments!
 - Flexible e-commerce with features to accommodate client wants, which are varied.
 - easy to configure ecommerce features
 - Ecommerce suited to Australia usage (shipping/taxes)

Things You Want In A Platform

- 20 Hosted solution (like Shopify but without eCommerce)
 - Secure hosting and platform
 - Not be reliant on a specific platform
 - secure hosting (same as Adobe BC delivers)
 - Hosting multiple sites management console
 - A "Better" BC - Open CMS, Centralized CRM, Flexible Web App IDE w/ Liquid, Forms w/ Workflow
 - Everything BC had
 - Integrated Hosting, DNS, Email, CMS, eCommerce, Marketing
 - No dedicated hosting
 - Equivalent level of managed hosting (secure, stable, same performance) with similar package level
 - Robust well implemented: eCom, events management, customizable apps, login secure zones (for admin)
 - Scalability and real backup and migration import export facilities,
 - Hosting and e-mail accounts
 - OSS open source & docker deployment
 - Email Creation / Hosting
 - integrated email hosting
 - Balance between stability, availability and cost - i.e. Reliable for \$50 per month
 - Affordable plans including Webapps with NO ecommerce
 - Cost should be competitive
 - White label

- 7 Same features as Adobe Business Catalyst (All in one package with security updates)
 - Modules: Blog, Events, Gallery, Forum etc
 - As many single source capabilities as possible in one solution.
 - backend admin similar to BC or easier
 - Integrated blog and social media
 - The ability to set up a site without having to know all sorts of code.
 - Consistent development of app (again like Shopify where improvements seemed to be made often)

- 6 Ability to edit the html and css code, if I want to change something I don't like or add something I want
 - Wyswyg for client
 - Intuitive UI
 - End user WYSWYG - drag and drop editing capabilities
 - Easy for clients to edit without screwing with the design
 - Simple for clients to do their own Content Management

- 3 Automated migration process, i.e, new platform recognises the BC modules and converts them to the new platform
 - Easily migrate my BC sites to it
 - Portability.

- 5 Easy to develop and simple to understand by designers
 - allow design and development flexibility and freedom
 - freedom & control
 - No coding
 - Great documentation /tutorials

Things You Want In A Platform

- 1 Site to perform well on google (SEO) and SSL
- 2 Combination of BC Gurus & BC Academy support.
community & collaboration
- 6 Included email campaigns (15,000)
Integrated email marketing
Email marketing
email marketing
A easy to use email campaign system like BC's
Complete, Built-in Zapier Integration / Synergy 8's Email Marketing
- 4 Secure zones
secure zones
Membership
Secure Member & Document Zones
- 5 Staple pricing - no per user/customer pay scales
No Partner signup fees
Ability to mark up hosting or a better commission structure.
Decent pricing/partner benefits
Compelling white label plans

3rd party apps

Multi-lingual content management

Should able create complicated application and communicate with mobile apps.

Booking engine

Custom Reports

My sites need to have great SEO features for ongoing retainer contracts.
